DIRECTIONS FOR USE

Sweep or vacuum the wood floor. Mix one part *Squeaky Cleaner* to four parts water. *Squeaky* can then be transferred into a spray bottle for spot cleaning. To spot clean, spray *Squeaky Cleaner* on a clean sponge or dry towel and wipe the surface clean. For large surfaces, mix *Squeaky Cleaner* in a bucket. Soak several large towels in the solution, making sure they are thoroughly wet. Wring out the towels to remove excess moisture. Wrap a towel around a push broom and tack the floor. To prevent redeposit of dirt and oil, refold towel using clean sides as needed. Pay special attention to corners. Repeat the procedure in each area of the floor until the entire floor has been cleaned.

If using an automatic scrubber, use a dilution rate of 4 parts water to 1 part Squeaky Cleaner with a white or red pad. Make sure squeegees and buffing pads work well. A person with a mop must follow behind the scrubber to pick up any water that is not picked up from the machine. Pay special attention to corners.

Do not pour Squeaky Cleaner directly on the wood floor. Excess liquid on any hardwood floor may damage the fibers. *Squeaky Cleaner* has been formulated for use on urethane-finished wood floors. Do not use this product with any wax-finished floors.
